# Scan, pack and deliver: it's as easy as ABS

## Leadtec **ABS**

**At Leadtec, we've developed the perfect scanpacking solution for your business. Our ABS software allows you to scan, pack and deliver merchandise to large retailers and other outlets. It meets the EANway standards and requirements of major Australian retailers.**

With ABS, you can:

- reduce costs by reducing errors and shortening ordering cycles
- be 'green' – paperless ordering cycle helps the environment
- use portable barcode scanning where you need it
- achieve greater control with administration and warehouse modules
- easily increase throughput by adding extra scanners when you need it.

Leadtec ABS software features a built-in EDI translator and workflow design making it easy to use without specialist EDI or retailer-specific knowledge. The software takes the user step-by-step through the picking process, automatically validating price and product data along the way.

Leadtec offers a range of additional ABS products to enhance your business capability.
